

How To Make A Bird Feeder

Instructions

You will need an empty bottle, seed, scissors and strong string or wire.

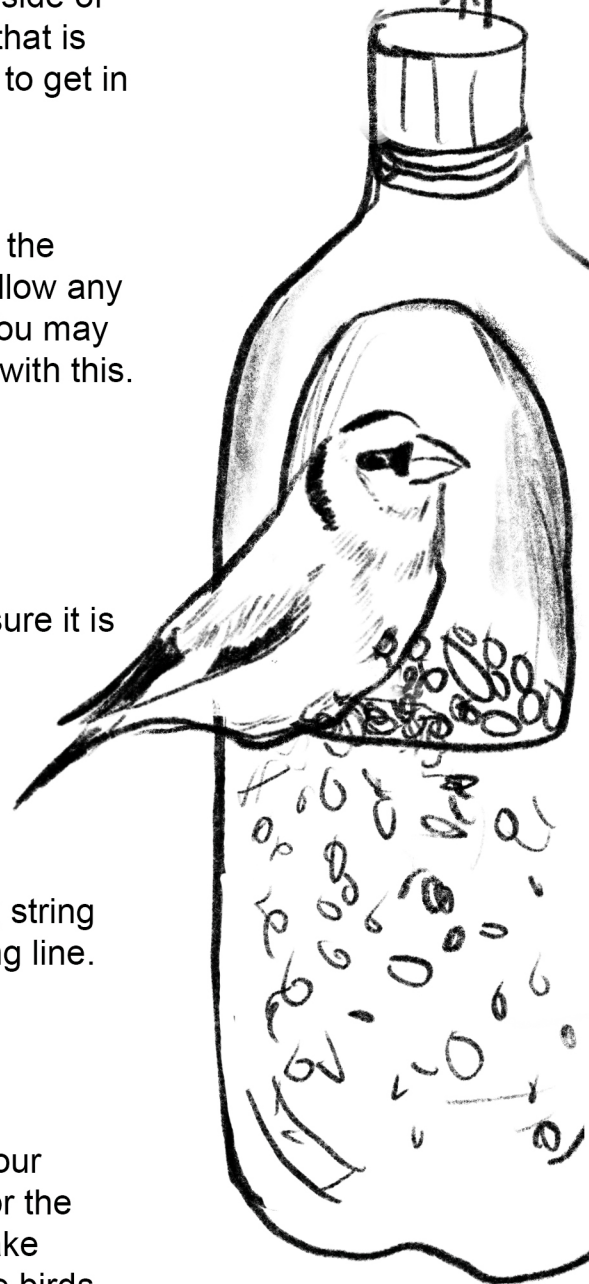

Carefully cut a hole in the side of the bottle near the top so that is large enough for the birds to get in and out of.

Make a few small holes in the bottom of your feeder to allow any rainwater to drain away. You may need an adult to help you with this.

Fill it with seeds, making sure it is not too full.

Hang it with wire or strong string from a tree or your washing line.

Keep an eye on it and if your feeder starts to wear out or the food in it goes mouldy, make another one! Watch for the birds coming to visit!
